Message

Thanks for the UST information from Paula Harris. In April 1986, prior to the registration requirement for UST's I instructed my staff to remove all known UST's and provide for the above ground storage of #2 diesel only. This was a costly project but I knew that once we were on a list; inspections, fees, fines and regulations were sure to follow. We have no UST's at either the East or West Terminals.

Conservation and Recovery Act, you should be receiving two publications from the EPA in the next several weeks.

One is entitled "Musts for UST's" and provides an overview of the technical requirements. The other is titled "Dollars and Sense" and provides an overview of the financial assurance requirements.

Attention to these recommendations is important and we urge your prompt action. It must not be assumed that every unsafe condition or procedure has been covered in our survey. Further, we make no representation nor assume any responsibility that locations, products, work places, operations, machinery and equipment are safe or healthful or in compliance with any law, rule or regulation.
